Video Cassette Recorder

VR601BMG

Playback

Hi-Fi Stereo Sound with Built-In MTS/SAP Decoder

Record stereo videotapes from stereo sound sources and playback pre-recorded hi-fi stereo tapes in hi-fi stereo sound using two audio heads and four video heads. Delivers an excellent 90dB+ dynamic range–through a stereo-equipped TV or regular TV and stereo hi-fi home audio system. The built-in MTS/SAP decoder allows reception and recording of off-air television stereo broadcasts and second audio program transmissions, where available. Back-up memory logic retains the cable channel guide map indefinitely even during a power failure or when the VCR is disconnected from its power source.

Picture

4-Head, Double Azimuth Design

Combines direct drive cylinder and capstan motors with precision digital servo control to produce excellent special effects reproduction–Still, Slow, and with the appropriate remote control, Frame Advance, Variable Slow Motion and x2 Play–in both SP and SLP speeds.

Auto Head Cleaner

Gently, automatically cleans the video heads each time a tape is inserted or removed to maintain optimum picture performance during both recording and playback.

Digital Auto Tracking System

When tape playback begins, this feature automatically seeks the optimum tracking position in the tracking range, and the optimum audio signal tracking position for clearest picture and sound. Buttons on the remote transmitter give you manual control should tracking adjustments be necessary.

Convenience

Front Panel Audio/Video/Game Inputs

Provide added convenience to the user when recording tapes directly from a camcorder to the VCR. In addition, accessory video equipment such as a video game or Web browser can be connected for direct playthrough to the TV set.

LED Function Indicators

Alerts you to the status of all important recording and playback features with simple, easily recognized, international symbols.

Bilingual (English/Spanish) Onscreen Function Display

Indicates record/playback functions, channel number, clock setting, date, counter, programming, one-touch record and record standby, keeping you alert to the status of all features in a heads-up onscreen display.

Onscreen Real-Time Counter with Time Search

Unlike the 0000 to 9999 tape counters found in standard VCRs, this unit incorporates a linear, real-time counter which shows elapse time in hours, minutes, and seconds. Now you can advance or return to selected tape segments in any time increment you desire.

Time Search

Special Effects

Slow Motion

View SP or SLP video recordings in slow motion in both forward and reverse modes.

Still Frame

Freeze the video at the touch of a button for a smooth, clear image.

Remote Control

Unified TV/VCR Remote *(Remote # N9031UD)*
